Work Winning/Bid Contributions

**Qualifications**

Safety (ROSPA); Engineering (HVAC) & Energy Mgt (CIBSE) & vocational training

Bill is an experienced Facilities/Project Manager originally from an M&E background with a successful track record of establishing, developing, leading and managing project and FM operations as well as focused strategic business planning.

He has substantial experience of Hard and Soft services delivery including property services matters, project management, financial management and budgetary control, developing and mentoring staff, contract management, SLA & KPI reporting and Helpdesk management.

Bill possesses excellent communication skills and an ability to interact at all levels; is analytical and well organised; technically competent; commercially astute; effective in both large and small organisations and computer literate. His employment history includes working at Contract Director level with high profile blue chip clients, (including McKinsey; KPMG & the Mapeley contract).

Bills latest assignment has been mobilising an extensive contract, with a new business model for ISS Integrated Services for the Alstom Trains contract, which has included the FACTS Help Desk solution; asset management; building services (catering; cleaning; security), PPM & reactive works and minor projects (valued up to £400k). The role extended to include recruitment of key positions & ensuring the Health & Safety & Financial Governance structures were robust and executed, with Quality & Risk Management through OHSAS 18001 & OHSAS 14001 standards.

Bill is a strong operational practitioner and change manager and used to dealing with high profile and high pressure assignments, liaising with stakeholders at all levels.
